#SocialValueNL Charter

#SocialValueNL Charter

Introduction

Our ambition is for North Lincolnshire to be the #bestplace for residents. This means ensuring that the effects of investment and growth in North Lincolnshire are positive and inclusive by contributing social value that enhances the long term social, economic and environmental wellbeing of communities and individuals.

Our aim is to be among the top quartile of areas for relevant social value measures by 2025 and top 10% by 2030.

Working with our partners, contracted suppliers and providers:

We will:

Enable all residents to benefit from growth and realise their full potential

Create strong, proud, independent, cohesive and resilient communities

Make North Lincolnshire healthier, greener, cleaner and more sustainable

Enhance the independence and wellbeing of vulnerable people

Which we will achieve by:

Improving skills and enhancing employment pathways

Addressing pay and other inequalities

Promoting UK steel and local supply chains

Improving opportunities for people with disabilities

Supporting care leavers

Increasing community engagement, participation and volunteering

Enabling health and wellbeing improvement

Supporting carers

Reducing waste and carbon emissions

Success will look like:

Young people and adults achieve their full potential and their wellbeing is enhanced – *measured by the employment rate and benefit claimant levels for young people and adults and relevant well-being indicators*

Businesses have a more skilled workforce – *measured by the number of residents qualified to NVQ Level 4 or equivalent*

Pay and wider inequalities are reduced – *measured by the percentage of jobs paying the living wage foundation rate*

Health and wellbeing of residents is enhanced – *measured by relevant health and wellbeing indicators*

Local industry and supply chains are economically viable and sustainable – *measured by the number of signatories to the UK Steel Charter and business survival rates*

A greener, cleaner and more sustainable area – *measured by the level of CO2 emissions and tonnages of domestic and commercial waste*

Vulnerable people achieve their full potential and their wellbeing and independence are enhanced – *measured by the number of people with a learning disability in employment*

Carers are supported and their wellbeing and capacity for caring are enhanced – *measured by the number of carers, the number of unpaid hours provided for caring and the satisfaction of carers*

Individuals and communities are stronger, more independent, cohesive and resilient – *measured by the number of community groups and levels of volunteering*

Care leavers are supported and their wellbeing is enhanced – *measured by the number of care leavers in employment, living independently and their satisfaction*
